01 · WHO WE ARE

About Aaradhya Enviro

Environmental pollution is one of the most pressing challenges facing industry today, threatening the air we breathe, the water we drink and the food we grow. As regulations tighten, industries are expected to operate responsibly while staying profitable.

Aaradhya Enviro was founded in 2018 in Waluj MIDC, Chhatrapati Sambhajinagar, to solve exactly this problem. Backed by a team with 10+ years of hands-on experience, we have served 500+ clients — from small manufacturing units to large industrial groups, sugar factories, construction companies and multinational corporations.

We do not stop at paperwork. We design, install, operate and maintain the physical systems — ETPs, STPs, RO and ZLD plants, air pollution control equipment — that keep a facility compliant every single day.

AT A GLANCE

Founded
2018

Head office
Waluj MIDC, Chh. Sambhajinagar

Clients served
500+

Team experience
10+ years

Services
17 specialised services

Coverage
Maharashtra & PAN India on request

Our mission

To make environmental compliance simple, transparent and achievable — protecting the environment while helping clients reduce risk and cost.

Our vision

To be one of Maharashtra's most trusted names in environmental consultancy and turnkey pollution control.

Our values

Environment first
Every solution is designed to protect air, water and soil, not just to pass an inspection.

Client-centric support
Timely, responsive service from the first site visit to years of ongoing O&M.

Engineering quality
Designs based on real data, proven technology and careful execution.

Trust & transparency
Clear scope, honest timelines and documentation you can rely on.

02 · OUR APPROACH

Why industries choose us

Local regulatory expertise

Based in Waluj MIDC with deep, day-to-day experience of MPCB procedures across Maharashtra.

One partner, every stage

Design → approvals → installation → testing → O&M → renewals, under a single accountable team.

Compliance that holds up

Reports and records prepared to match your actual operations, so inspections hold no surprises.

Responsive support

Reach us on phone and WhatsApp at any time for urgent compliance or breakdown issues.

One partner, every stage

01 Site visit & assessment

02 Design & engineering

03 Regulatory approvals

04 Fabrication & installation

05 Testing & commissioning

06 O&M, monitoring & renewals

Industries we serve

- Chemical & pharma
- Sugar & food processing
- Engineering & automotive
- Construction & real estate
- Hospitals & healthcare
- Textile & agro-industries

Our services

COMPLIANCE & CONSULTANCY

MPCB Consent & Legal Compliance
Consent to Establish (CTE), Consent to Operate (CTO), renewals, amendments and statutory filings with MPCB.

Environmental Clearance (EC)
EC under the EIA Notification 2006: Form 1, ToR, EIA coordination, public hearing and SEIAA / MoEFCC approvals.

Environmental Audit & Reporting
Environmental Statement (Form V), annual returns, compliance audits and due-diligence reports.

CGWA NOC & Bio-Medical Waste Authorisation
Groundwater extraction NOC (CGWA) and Bio-Medical Waste authorisation for healthcare facilities.

TURNKEY PROJECTS

ETP & STP Design and Installation
Turnkey Effluent and Sewage Treatment Plants: design, supply, installation, commissioning and handover.

ZLD & RO Systems
Zero Liquid Discharge and industrial RO: water recovery with UF, RO, evaporators and dryers.

Air Pollution Control Systems
Wet scrubbers, bag filters, cyclones, stacks and ducting to meet emission limits.

Plant Up-gradation & Retrofit
Performance audits, capacity enhancement and retrofits for under-performing treatment plants.

From consent application to commissioned plant

We prepare MPCB and Environmental Clearance applications and design, build and commission the treatment systems those approvals require — so documents and plant performance always match.

Our services

TESTING & MONITORING

Air, Water & Soil Testing
Stack, ambient air, effluent, drinking water and soil testing with compliance interpretation.

Noise Level Monitoring
Ambient, boundary, workplace and DG-set noise monitoring with control recommendations.

Online Monitoring Systems (OCEMS)
Online continuous emission and effluent monitoring connected to CPCB / MPCB servers.

Treatability Studies
Lab and pilot trials that prove the right treatment process before you invest.

MANAGEMENT & TRAINING

Hazardous Waste Management
Authorisation, storage, manifests, records and annual returns under the Hazardous Waste Rules.

Plastic EPR Compliance
CPCB EPR registration, targets, certificates and annual returns for plastic packaging.

Operation & Maintenance (O&M)
Trained operators, daily logs, testing and preventive maintenance for ETP, STP, RO and ZLD plants.

Compliance Training
Practical training for managers, EHS teams and plant operators on compliance and plant operation.

Nucleonic Gauge & Radioactive Source Compliance
AERB documentation and coordination for safe, authorised disposal of disused nucleonic sources.

Key annual compliance deadlines

Filing	Who files	Due
Environmental Statement (Form V)	All units holding MPCB consent	30 September
Hazardous waste annual return	Hazardous waste generators	30 June
Bio-medical waste annual report	Hospitals, clinics, labs	30 June
Plastic EPR annual return	Producers, importers, brand owners	30 June
EC six-monthly compliance report	Projects with Environmental Clearance	1 June & 1 December
Consent / NOC renewal	MPCB consent, CGWA NOC holders	Well before expiry

As per current rules; always check the conditions in your own consent or authorisation. We track these dates for our clients.

05 · TURNKEY EQUIPMENT

Systems we deliver

WASTEWATER

Effluent Treatment Plant (ETP)

- Designed from your actual effluent analysis
- Physico-chemical and biological stages
- Low operation and maintenance cost

WASTEWATER

Sewage Treatment Plant (STP)

- Advanced biological treatment
- Low odour and low noise operation
- Compact, space-saving designs

WATER RECOVERY

Zero Liquid Discharge (ZLD) System

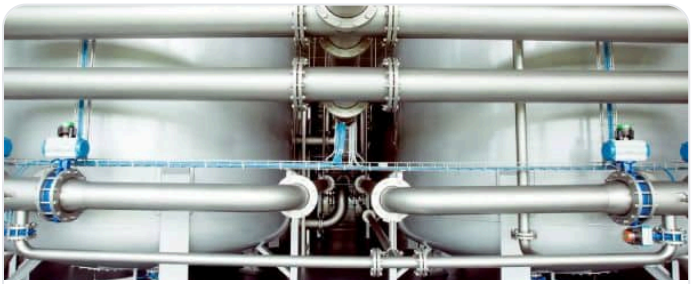

- High-recovery RO
- MEE / MVR evaporators and ATFD
- Automation and online monitoring

WATER RECOVERY

Reverse Osmosis (RO) System

- High recovery rates
- Automated controls and CIP
- Anti-scalant dosing

WATER TREATMENT

Water Treatment Plant (WTP)

- Multi-stage filtration
- Softening and chemical dosing
- Consistent water quality

AIR

Air Pollution Control System

- High particulate removal
- Custom scrubber designs
- Stack with sampling facility

06 · CLIENTS & FEEDBACK

Trusted by 500+ clients

What our clients say

> “Aaradhya Enviro handled our MPCB Consent to Establish and Consent to Operate documentation flawlessly. The team is highly knowledgeable and made the entire compliance process stress-free for us.”

Rajesh Kumar · Plant Manager, Jalna Industrial Unit

> “We had our ETP installed by Aaradhya Enviro and the system has been running perfectly for 3 years. Their O&M team is responsive and ensures we always remain MPCB compliant.”

Suresh Mane · Director, Beed Manufacturing Co.

> “Getting Environmental Clearance for our expansion project seemed impossible until we partnered with Aaradhya Enviro. They managed everything from EIA to the public hearing. Excellent team!”

Priya Deshmukh · CEO, Aurangabad Infrastructure

> “Our ZLD system was installed on time and within budget. The design team understood our specific chemical effluent requirements and delivered a solution that works perfectly for us.”

Anil Joshi · Works Manager, Nashik Chemical Plant
